

Patrick Graf

SCHRIFTENVERZEICHNIS

EINGEREICHT

- [15] *A note on Flenner's extension theorem*, Preprint unter [arxiv:1905.01983](https://arxiv.org/abs/1905.01983).
- [14] *Differential forms on log canonical spaces in positive characteristic*, Preprint unter [arxiv:1905.01968](https://arxiv.org/abs/1905.01968).
- [13] (mit HANNAH BERGNER) *The Lipman–Zariski conjecture in genus one higher*, Preprint unter [arxiv:1901.06009](https://arxiv.org/abs/1901.06009).
- [12] (mit MARTIN SCHWALD) *On the Kodaira problem for uniruled Kähler spaces*, Preprint unter [arxiv:1805.02277](https://arxiv.org/abs/1805.02277).

ANGENOMMEN/ERSCHIENEN

- [11] *The Lipman–Zariski conjecture in low genus*, Int. Math. Res. Notices (2019). Erscheint noch im Druck. DOI [10.1093/imrn/rnz154](https://doi.org/10.1093/imrn/rnz154).
- [10] (mit TIM KIRSCHNER) *Finite quotients of three-dimensional complex tori*, angenommen bei Ann. Inst. Fourier (Grenoble).
- [9] (mit BHARGAV BHATT, JAVIER CARVAJAL-ROJAS, KARL SCHWEDE und KEVIN TUCKER) *Étale fundamental groups of strongly F -regular schemes*, Int. Math. Res. Notices (2017). Erscheint noch im Druck. DOI [10.1093/imrn/rnx253](https://doi.org/10.1093/imrn/rnx253).
- [8] (mit KARL SCHWEDE) *Discreteness of F -jumping numbers at isolated non- \mathbb{Q} -Gorenstein points*, Proc. Amer. Math. Soc. **146** (2018), pp. 473–487
- [7] *Algebraic approximation of Kähler threefolds of Kodaira dimension zero*, Math. Ann. **371** (2018), pp. 487–516
- [6] *A Mehta–Ramanathan theorem for linear systems with basepoints*, Math. Nachrichten **289** (2016), pp. 1208–1218
- [5] *The jumping coefficients of non- \mathbb{Q} -Gorenstein multiplier ideals*, J. Algebra **450** (2016), pp. 323–348
- [4] *The generalized Lipman–Zariski problem*, Math. Ann. **362** (2015), pp. 241–264
- [3] (mit SÁNDOR J. KOVÁCS) *Potentially Du Bois spaces*, J. Sing. **8** (2014), pp. 117–134
- [2] (mit SÁNDOR J. KOVÁCS) *An optimal extension theorem for 1-forms and the Lipman–Zariski Conjecture*, Documenta Math. **19** (2014), pp. 815–830
- [1] *Bogomolov–Sommese vanishing on log canonical pairs*, J. Reine Angew. Math. (Crelle) **702** (2015), pp. 109–142
